

## B.1. CV sent to inside reviewers

### *Curriculum Vitae*

### **Almantas Galvanauskas, Ph.D.**

*University of Michigan*  
*Department of Electrical Engineering and Computer Science*  
*1301 Beal Avenue • Ann Arbor, MI 48109-2122*  
*Office Phone: (734) 615 7166 • FAX: (734) 763 4876*  
*E-mail: almantas@eecs.umich.edu*

### **EDUCATION:**

Royal Institute of Technology, Stockholm, Sweden, 1990-1992

**Ph.D. in Physics**, 1992

Area of specialization: Ultrafast Diode Lasers

Thesis title: “*Ultrafast Optoelectronics with Semiconductor Diode Lasers*”

Vilnius University, Vilnius, Lithuania, 1982-1986

**Diploma in Physics** (equivalent to M.S.)

Area of specialization: Semiconductor Physics

### **FIELDS OF INTEREST:**

Fiber and integrated optics: fiber lasers and amplifiers, nonlinear fiber and waveguide devices; Ultrafast science and technology: ultrashort-pulse lasers, ultrafast-waveform shaping, ultrafast measurements, THz radiation; Nonlinear optics: quasi-phase-matched nonlinear interactions, electrically poled ferroelectric materials and poling technology; Semiconductor lasers; Photonic band-gap materials and devices; Laser plasma generation of EUV and X-ray radiation

### **EXPERIENCE:**

Associate Professor, Department of Electrical Engineering and Computer Science, University of Michigan, Ann Arbor, MI, 2002-present

- Projects on kW power and energy scaling of fiber lasers and novel fiber designs
- Projects on extreme ultraviolet light generation for next-generation lithography tools using fiber lasers
- Projects on novel ultrashort-pulse laser techniques (novel pulse compression and pulse shaping technologies)
- Projects on beam shaping and combining exploiting parametric interactions and spatial soliton formation
- Projects on studying laser-driven propulsion

Group leader, IMRA America, Inc., Ann Arbor, 2001

- R&D of high-power and high-energy femtosecond fiber lasers and nonlinear devices.

Research scientist, IMRA America, Inc., Ann Arbor, 1994 – 2000

- Leading a research project on high-power and high-energy femtosecond fiber systems.
- Leading a research project on parametric chirped pulse amplification systems.
- Coordination of several engineering projects on building high power fiber-based lasers.
- Responsible for research and development of multifunctional quasi-phase-matched nonlinear devices.
- Co-coordination of a research project on the development of nonlinear optical waveguide devices and their applications.

Postdoctoral researcher, IMRA America, Inc., Ann Arbor, 1993 – 1994

- Demonstration of first high-energy (microjoule) femtosecond fiber systems.

Staff researcher, Institute of Optical Research, Stockholm, 1992 – 1993

Visiting scientist/graduate student, Royal Institute of Technology, Stockholm, 1990 – 1992

- Development and study of a fast-tuning technique using tunable laser diodes and its application to ultrashort pulse generation and ultrafast measurements.
- Study of using nonlinear optical waveguides for ultrafast measurement techniques.

Staff researcher/graduate student, Semiconductor Physics Institute, Vilnius, Lithuania, 1986 – 1992

- Study of ultrafast processes in narrow-band-gap semiconductor materials.
- Development of electro-optic and photoconductive sampling techniques based on gain-switched diode lasers.

## ACHIEVEMENTS:

### *Research:*

- Demonstrated kW fiber laser systems.
- Demonstrated fiber-laser driven extreme ultraviolet (EUV) generation.
- Demonstrated novel devices for arbitrary-optical-waveform generation based on hybrid fiber-optic and MEMS technologies.
- Pioneered the development and study of large-core fiber amplifier technology. This allowed to challenge traditional peak-power limitations in fiber-optics and to demonstrate femtosecond fiber systems with ~ 1 mJ pulse energies and > 10 W average powers.
- Pioneered the development of compact chirped-pulse-amplification circuitry for use in high-power femtosecond fiber systems. This includes introduction of fiber-grating pulse stretchers and compressors, the first demonstration of volume Bragg-grating pulse stretchers and compressors, and the pioneering experiments on pulse compression and arbitrary shaping in a periodic quasi-phase-matched structures in electric-field poled lithium niobate.
- Pioneered the development and study of a parametric chirped pulse amplification method in quasi-phase-matched materials to replace conventional regenerative amplifiers. This includes demonstration of all-diode-pumped parametric systems using microchip and fiber based pump sources.
- Demonstrated first wavelength-tunable fiber lasers using parametric interactions in quasi-phase-matched materials.
- Contributed to the development of highly nonlinear optical waveguides in periodically poled lithium niobate for efficient fiber-pumped parametric and frequency-mixing interactions.
- Pioneered the development of a fast-tuning technique using tunable-wavelength semiconductor lasers for arbitrary-rate ultrashort pulse generation and for real-time picosecond-pulse oscilloscopic measurements.

### **Engineering:**

- Development of the first commercial fiber chirped pulse amplifier (FCPA-2), winner of Laser Focus World “Commercial Technology Achievement Award 2001”.
- First research prototypes of high-energy parametric chirped pulse amplifiers, exhibited at CLEO’98 and CLEO’99.

### **Publications:**

Author and co-author of approximately 100 papers, conference contributions (invited and regular) and 27 inventions (invention disclosures, pending applications and granted patents). See *Publications Supplement to CV* with the detailed list of the papers, presentations and inventions.

## **COURSES TAUGHT**

### *Undergraduate*

*Principles of Optics* (EECS #334, Winter 2003, Winter 2004, Winter 2005)

### *Graduate*

*Optical Waves in Crystals* (EECS #538, Winter 2002, Fall 2002, Fall 2003)

*Photonic Crystals* (EECS #598 Special Topics, Fall 2004)

## **COURSES INTRODUCED AND DEVELOPED**

### *Graduate*

*Photonic Crystals* (EECS #598 Special Topics, Fall 2004)

### **ADVISEES (Ph.D. students):**

Kai-Hsiu Liao	EECS Department	graduate student
Ming-Yuan Cheng	EECS Department	graduate student
Yu-Chung Chang	EECS Department	graduate student
Chi-Hung Liu	EECS Department	graduate student
Kai-Chung Hou	EECS Department	graduate student
Craig Swan	Physics Department	graduate student

## **PROFESSIONAL SERVICE**

- Guest Editor for IEEE JSTQE special issue on “Ultrafast Optics and Optoelectronics” for 2006
- Member of the program committee for Conference on Laser and Electro-Optics CLEO’2002, CLEO’2003 and CLEO’2004 subcommittee “Fiber and Guided-Wave Lasers, Amplifiers and Sensors”
- Member of the program committee for PHAST 2005
- Member of the program committee for CLEO Europe/EQEC’2003 and 2005, subcommittee “Fiber, Waveguide and Integrated Optics Lasers and Amplifiers”.
- Member of the program committee for EUROPHTON 2004 (Organized by European Physical Society)
- Member of the program committee for OSA Annual Meeting 1998
- Program committee Division chair for OSA Annual Meeting 2002 & 2003
- Member of the program committee for SPIE Photonics West 2002, 2005 and 2006
- President of the Local Chapter of the Optical Society of America, Ann Arbor, September 2003 – September 2004

## UNIVERSITY SERVICE

- Committee Member, Graduate Admissions, Fall 2005 – Winter 2006
- Committee Member, ECE Curriculum subcommittee, Fall 2005 – Winter 2006
- Committee Member, Graduate Admissions, Fall 2004 – Winter 2005
- Committee Member, ECE Curriculum subcommittee, Fall 2004 – Winter 2005
- Committee Member, EECS Curriculum Committee, Fall 2003 – Winter 2004
- Committee Member, EECS Curriculum Committee, Winter 2003

*Publications Supplement to Curriculum Vitae*

**Almantas Galvanauskas, Ph.D.**

“Challenges for High Intensity Fiber Technology”

A. Galvanauskas

Invited presentation at “Fiber Laser Workshop”, Jena, Germany, April 1<sup>st</sup>, 2003

“High Intensity Fiber Lasers”, A. Galvanauskas

in Army Research Office Workshop on Relativistic and Sub-Relativistic Intensity: Physics and Applications, University of Michigan, August 29 – 30, 2002

Invited presentation at Stanford University, in colloquem series at Ginzton Laboratory, Applied Physics Department, February 2002

## Inventions

### Patents

MONOLITHIC FIBER-GRATING AND MEMS BASED DEVICES FOR ARBITRARY OPTICAL-WAVEFORM SHAPING, A. Galvanauskas, Y. B. Gianchandani, K.-H. Liao, K. Udeshi, L. Que (University of Michigan, patent disclosure)

STRETCHING AND COMPRESSION OF LASER PULSES BY MEANS OF HIGH EFFICIENCY VOLUME DIFFRACTIVE GRATINGS WITH VARIABLE PERIODS IN PHOTO-THERMO-REFRACTIVE GLASS, E. Flecher, A. Galvanauskas, L. B. Glebov, K.-H. Liao, V. I. Smirnov, (University of Central Florida and University of Michigan, patent application)

MODE SCALABLE OPTICAL FIBERS FOR HIGH POWER FIBER LASERS, A. Galvanauskas (University of Michigan, patent application)

FIBER LASER - BASED EUV-LITHOGRAPHY, G. A. Mourou, A. Galvanauskas, W. Theobald, J. Nees, B. Hou (University of Michigan, patent application)

Before joining University of Michigan:

Fermann; Martin E., Galvanauskas; Almantas, Harter; Donald J.

Modular, high energy, widely-tunable ultrafast fiber source

**6,885,683**

Issue date April 26, 2005

Galvanauskas; Almantas, Arbore; Mark A., Fejer; Martin M., Harter; Donald J. Ultrashort-pulse source with controllable wavelength output

**6,744,555**

Issue date June 1, 2004

Sucha; Gregg D., Harter; Donald J., Galvanauskas; Almantas  
Single-shot differential spectroscopy and spectral-imaging at submillimeter  
wavelengths

**6,723,991**

Issue date April 20, 2004

Galvanauskas; Almantas, Wong; Ka K., Harter; Donald J.  
Ultrashort-pulse source with controllable multiple-wavelength output

**6,549,547**

Issue date April 15, 2003

Galvanauskas; Almantas, Harter; Donald J., Wong; Ka K., Fermann; Martin E.  
Optical parametric amplifiers and generators in optical communication systems

**6,344,921**

Issue date February 5, 2002

Galvanauskas; Almantas, Wong; Ka K., Harter; Donald J.  
Ultrashort-pulse source with controllable multiple-wavelength output

**6,334,011**

Issue date December 25, 2001

Stock; Michelle L., Fermann; Martin E., Galvanauskas; Almantas, Harter; Donald J.,  
Sucha; Gregg D.

Apparatus and method for delivery of dispersion-compensated ultrashort optical pulses  
with high peak power

**6,249,630**

Issue date June 19, 2001

Galvanauskas; Almantas, Harter; Donald, Sucha; Gregg  
Quasi-phase-matched parametric chirped pulse amplification systems

**6,208,458**

Issue date March 27, 2001

Galvanauskas; Almantas, Harter; Donald J.  
Use of Chirped Quasi-phase-matched materials in chirped pulse amplification systems

**6,198,568**

Issue date March 6, 2001

Galvanauskas; Almantas, Hariharan; Anand, Harter; Donald J.  
Quasi-phase-matched parametric chirped pulse amplification systems

**6,181,463**

Issue date January 30, 2001

Galvanauskas; Almantas, Wong; Ka K., Harter; Donald J.  
Ultrashort-pulse source with controllable multiple-wavelength output

**6,154,310**

Issue date November 28, 2000

Fermann; Martin E., Galvanauskas; Almantas, Harter; Donald J.  
Apparatus and method for the generation of high-power femtosecond pulses from a  
fiber amplifier

**6,014,249**

Issue date January 11, 2000

Fermann; Martin E., Galvanauskas; Almantas, Harter; Donald J.  
Apparatus and method for the generation of high-power femtosecond pulses from a  
fiber amplifier

**5,880,877**

Issue date March 9, 1999

Galvanauskas; Almantas, Arbore; Mark A., Fejer; Martin M., Harter; Donald J.  
Use of aperiodic quasi-phase-matched gratings in ultrashort pulse sources

**5,867,304**

Issue date February 2, 1999

Stock; Michelle L., Bendett; Mark P., Galvanauskas; Almantas, Harter; Donald J.,  
Sucha; Gregg D.

Apparatus and method for delivery of dispersion compensated ultrashort optical pulses  
with high peak power

**5,862,287**

Issue date January 19, 1999

A. Galvanauskas, A. Hariharan, D. Harter

“Hybrid short-pulse amplifiers with phase-mismatch compensated pulse stretchers and  
compressors”

**5,847,863**

issue date December 8, 1998

A. Galvanauskas, M. E. Fermann, D. Harter

“High power fiber chirped pulse amplification systems based on cladding pumped rare-  
earth doped fibers”

**5,696,782**

issue date December 9, 1997

A. Galvanauskas, D. Harter

“Frequency chirp control and compensation for obtaining broad bandwidth ultrashort  
optical pulses from wavelength-tunable lasers”

**5,633,885**

issue date May 27, 1997

A. Galvanauskas, M. E. Fermann

“Optical pulse amplification using chirped Bragg gratings”

**5,499,134**

issue date March 12, 1996

A. Galvanauskas

“Method and apparatus for generating high-energy ultrashort pulses”

**5,400,350**

issue date March 21, 1995

**Pending**

7 other pending patent applications or disclosures
