

Lecturer Advisory Committee

Scope of work

Our charge as a committee is to serve as a central hub for departments and units to share information. We strive to create a culture of inclusiveness, support, and appreciation for all lecturers who serve in the College of Engineering. We aim to understand the perspective and needs of the lecturers by communicating directly with them and providing opportunities for feedback and dialogue. Creating a two-way communication exchange between central administration of the College and our lecturers is important to everyone's success.

Committee members

Kelly Cormier, Computer Science and Engineering, kcormier@umich.edu
